### Product & Engineering Intern

RealtyShares // Crowdfunding Real Estate Platform

- Designed, coded, tested, and deployed a **full-stack Node-React** web application that increased deal underwriting efficiency by transforming a 30-minute manual task into an **automated process**. The web app validated borrower-provided spreadsheet inputs against data requested from external provider APIs and **rendered an interactive message with validation results**.
- Created a **product roadmap** for an internal document-tracking admin tool through stakeholder engagement, user testing, and engineering consultation. **Groomed and prioritized user stories and engineering tickets** in a way that would produce cumulative deliverables, and **scoped out the transition for users** to adapt to the improved, productized workflow.

### Senior Consulting Associate

Net Impact Berkeley // Social Impact Strategy Consulting Group

- **Selected out of 300 applicants** as a Consulting Associate as part of a student-run consulting organization serving **social enterprises, nonprofits, and sustainable businesses**
- Developed a **profit-maximizing expansion strategy** for a food sustainability startup by analyzing customer data and census reports using **Excel and R to predict demand for the product**. Built a **cost-minimization marketing model** that the client will use to expand into one of the recommended locations in early 2018.
- **Analyzed competitor strategies** and identified relevant training tools to provide a youth empowerment social enterprise with best practices to increase job attainment and retention upon program completion. **Increased program efficacy** will lead to **100 additional youth being hired** in Seattle by late 2017.
